CAREER SUMMARY

I am a visual artist and an academic with 3 years of teaching experience, holding a Doctoral Degree in Visual Arts from The University of Melbourne. I have excelled as an academic, presenting at conferences, moderating discussions, and leading workshops. My extensive experience encompasses exhibitions, awards, conferences and artist residencies. I am deeply engaged in exploring ecologies and landscapes as dynamic and militant processes rather than static cartographic objects signifying national substance. My artistic practice also includes groundbreaking work in new technologies, such as Machine Learning, Natural Language Processing and GANs in Visual Arts.

EDUCATION

PhD, Visual Arts, The University of Melbourne

2017 Feb – 2021 Nov

- Received the 4-year Australian Government Research and Training Program Scholarship covering all costs of PhD. with a monthly Stipend.
- Conducted practice-led research investigating the archive, its historical context, contemporary use in art and power politics.
- Challenged conventional typifications of the archive and proposed 'Anarchic Archive' as the novel approach based on Alain Badiou's theories on militant subject, truth event, being, and ethics of truth.

WORK EXPERIENCE

Lecturer, Faculty of Music and Fine Arts, The University of Melbourne, Australia

2021 Mar – 2023 June | 2018 March – 2019 June

- Conducting undergraduate level courses in **Visual Arts**, fostering an engaging and interactive learning environment.
- Taught various courses such as **Image and Text, Tools and Techniques (Digital Media), Impossibilities of the Object: Time, Translation and Sculpture** open to students from diverse backgrounds.
- Led tutorials and critical discussions that explored **new technologies of digital image making** such as **Generative Adversarial Networks (GAN's), Deep Learning algorithms and Data Visualisation** in the context of Contemporary Art.
- Developed **course curriculum, lectures, and assignments** aligned with the latest academic standards and emerging trends in the field.
- **Advised and mentored** students on **research projects, creative work and thesis preparation.**
- **Published** creative work at **national and international conferences**, contributing to the advancement of visual art cultures in South Asia.
- Successfully secured **research grants** and **collaborating with interdisciplinary teams** to conduct impactful research projects.
- Participated in **academic committees**, contributing to the university's administrative duties, and actively engaging in departmental and institutional initiatives.

Guest Faculty, School of Culture and Creative Expression Ambedkar University, New Delhi, India

2022 Jan – Jun

- Taught a theory course called **Critical Perspectives of Art**, open to master's students from all backgrounds.
- Introduced **interdisciplinary engagement** while investigating the concept of **margins and voids** through the works of Mathematician **Georg Cantor's Set Theory**, Philosopher **Alain Badiou's Mathematical ontology and the theory of Event**, Sociologist and activist, **Anand Teltumbde's Mahad: The making of the first Dalit Revolt** and IT activist **Timnit Gebru's Algorithmic Bias in Artificial Intelligence**.
- Organized **guest lectures** by inviting a diverse set of artists and researchers working across different cultures, media and research fields to enrich academic discourse and provide students with exposure to industry experts.
- Demonstrating a commitment to excellence in teaching, research, and service to further the university's academic mission.

Arts House Makeshift Publics Research Project, City of Melbourne

2022 Apr-23 Apr

- Spearheaded the development of an innovative RNN-based Machine Learning project utilizing Generative Adversarial Networks (GANs) and Deep Learning techniques.
- Employed advanced algorithms to produce captivating sounds, data visualizations, and textual outputs at LIEF HPC-GPGPU Facility.
- Transformed the generated sounds into interactive soundscapes, seamlessly integrated with GPS mapping technology to map across the Arts House neighborhood.
- Collaborated with a multidisciplinary team to create a custom-built app, enabling users to access and engage with the interactive soundscapes effortlessly.
- Contributed to the project's experimental research design, data analysis, and documentation of outcomes.
- Leveraged technology to explore the intersection of art, technology, and public engagement, fostering innovative artistic expressions within the urban landscape.

AWARDS
